

CALL FOR PAPERS

ICSCM 2022
Jun 21-22, 2022
Vienna, Austria

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSCM 2022 : International Conference on Statistical Computing and Mathematics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Statistical Computing and Mathematics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Statistical computing

Programming for statistical data analysis

Numerical methods for optimization and linear algebra

Monte carlo methods for statistical inference

Data partitioning and resampling

Numerical methods in statistics

Graphical methods in computational statistics

Exploring data density and structure

Statistical models and data fitting

Computing environment

Biostatistics and biocomputing

Categorical data analysis

Clustering and classification

Computer-aided data analysis

Computational bayesian methods

Computational econometrics

Data visualization

Extreme value theory and applications

Functional data analysis

High-dimensional data analysis

Kernel and monte carlo methods

Machine learning

Mixture models

Multivariate data analysis

Nonparametric statistics

Numerical methods in statistics
