

CALL FOR PAPERS

ICSDCE 2022
Jun 21-22, 2022
Vienna, Austria

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSDCE 2022 : International Conference on Structural Design and Construction Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Structural Design and Construction Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Construction engineering	Life cycle properties of constructed facilities
Designing, planning, construction, and management of infrastructures	Estimating and cost control
Construction procedures and methods	Planning and scheduling
Construction safety	Construction labor productivity
Project strategic management	Asphalt materials
E-business construction solutions	Alternative methods for project delivery
Constructability of the design	Construction computer applications
The design-construction interrelationship
