

# CALL FOR PAPERS

**ICSPET 2022**  
**Jun 21-22, 2022**  
**Vienna, Austria**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSPET 2022 : International Conference on Software Product Engineering and Testing is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Software Product Engineering and Testing. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Software product engineering  
Applications of software product engineering  
Advances in software product engineering  
Recent topics in software product engineering  
Usability engineering  
Software configuration management  
Management of software configuration management process  
Organizational context for software configuration management  
Constraints and guidance for software configuration management process  
Planning for software configuration management  
Software configuration management plan

Surveillance of software configuration management  
Software configuration identification  
Identifying items  
Project's defined software process  
Integrated software management  
Developing software requirements and software architecture  
Programming and integrating software components  
Software requirements document  
Software design document  
Test plan and test procedures  
Software work products, plans, commitments, and processes
