

## **CALL FOR PAPERS**

Jun 21-22, 2022 Vienna, Austria

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICTEYMSP 2022 : International Conference on Textile Engineering, Yarn Manufacture, Structure and Properties is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Textile Engineering, Yarn Manufacture, Structure and Properties. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Textile engineering Principles of textile engineering Textile fibers Classification of textile fibers Fiber forming polymers Methods of investigating fibre structure Yarn manufacture Yarn structure and properties Principles of opening, cleaning and blending of fibrous materials Fabric manufacture, structure and properties Textile testing Physical testing of textiles Chemical processing

Basic computer technologies
Technical drawing
Clothing machinery
Textile chemistry
Machine design process
Transmission technology
Quality management
Factory planning
Machine dynamics
Textile physics
Clothing, weaving and knitting
Quality control in textiles
Fabric design
