

CALL FOR PAPERS

ICEEPS 2022
Jun 29-30, 2022
Dubai, UAE

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEEPS 2022 : International Conference on Ecology, Environment and Plant Sciences is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Ecology, Environment and Plant Sciences. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Determining community composition
of different ecosystems
Biotic factors
(competition/facilitation) in
succession following different
kinds of disturbance (fire, floods,
glaciation)
Importance of herbivory in
preventing competitive exclusion
Introduced species - influence on
native species diversity
Plant species effects on nutrient
cycling

Influence of diversity on ecosystem
function
Coevolution between plants and
herbivore specialists
Potential ecological roles of plant
species in ecosystem
Climate change effects on
vegetation - past and future
Direct effect of elevated CO₂ on
vegetation
