

# CALL FOR PAPERS

**ICER 2022**  
**Jun 28-29, 2022**  
**London, United Kingdom**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICER 2022 : International Conference on Elastography and Radiography is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Elastography and Radiography. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Scintigraphy

SPECT

Emerging nuclear medicine priorities

Fluoroscopy

Projectional radiographs

Advances in chest radiography

Direct digital radiography

Applications of radiography

Molecular imaging in cancer treatment

Cardiovascular molecular imaging

Current molecular imaging strategies

Nuclear molecular imaging with nanoparticles

Future prospects of hybrid imaging technology

Ultrasound

Ultrasound elastography for thyroid nodules

Breast ultrasound imaging

Mammographic imaging

Cardiovascular imaging

Neuroimaging

Interventional imaging

Abdominal imaging

Thoracic imaging

Musculoskeletal imaging

The growth of radiology

Current trends in radiology

Cost and value in radiology
