

CALL FOR PAPERS

ICRAMSP 2022
Jun 28-29, 2022
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICRAMSP 2022 : International Conference on Recent Advances in Multimedia Signal Processing is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Recent Advances in Multimedia Signal Processing. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Multimedia signal processing and analysis
Multimedia signal denoising and enhancement
Multimedia content analysis and event detection
Multimedia security and forensics
Joint multimodal processing and analysis
Multimedia indexing and retrieval
Bio-inspired multimedia processing
Multimedia coding
Distributed/centralized source coding for sensor networks
Scalable and low delay source coding
Error/loss resilient source coding
Standards
Virtual reality and 3D

Augmented, mixed and virtual reality
3D imaging
2D/3D graphics/geometry coding and animation
Distributed virtual reality and immersive communications
3D audio and video processing and rendering
Multimedia networking
Multimedia communication over IoT
Green multimedia communication
Wireless multimedia sensor networks
QoS control and scheduling for real time applications
Networked audio and video quality monitoring and management
Cross-layer optimization
Multimedia systems and applications
