

CALL FOR PAPERS

ICCSM 2022
Jun 24-25, 2022
Paris, France

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCSM 2022 : International Conference on Chemistry of Superconducting Materials is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Chemistry of Superconducting Materials. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Superconducting materials
Novel superconducting materials and applications
Superconductivity, superconductors and superconducting materials
Engineering applications and processing challenges
Novel applications and manufacturing techniques
Chemistry of superconducting materials
Superconductor principles
High-temperature superconductors
Mechanical properties of superconducting materials

Iron-based superconductors
Organic superconductors
Carbon-based materials
Chemical doping effects on superconductivity
New materials
Physical and chemical properties of new superconducting materials
Material synthesis
Heterostructures
Thin films
