

CALL FOR PAPERS

ICGEO 2022
Jun 03-04, 2022
Rome, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGEO 2022 : International Conference on Geoprocessing and Earth Observation is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Geoprocessing and Earth Observation. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- Geo-processing
- Global positioning systems
- Geographical information
- Geographical information system software
- Geo-processing tools
- Important geo-processing tools
- Data management
- Spatial data editing
- Coordinate system management

- Geoprocessing functions
- Data models and the geodatabase
- Analysis techniques
- Data management and documentation
- Conceptualization and representation of spatial information
- Standard geoprocessing and analytical methods
- Different remote sensing platforms, instruments and data types
- Geographical information systems
- Earth observation
