

# CALL FOR PAPERS

**ICETESRR 2022**  
**Jun 07-08, 2022**  
**San Francisco, USA**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICETESRR 2022 : International Conference on Electrometallurgical Technologies, Electrolytic Separation, Recovery and Refining is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Electrometallurgical Technologies, Electrolytic Separation, Recovery and Refining. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Electrometallurgical technologies

Electrometallurgical processing technologies

Electrolytic separation, recovery and refining

Metal purification

Processes of metal electrodeposition

Modelling

Fundamental aspects of electrometallurgy

Elements of electrometallurgy

Experimental approach to electrometallurgy

Electrochemical technology

Electrowinning

Electrorefining

Electroplating

Electroforming

Electropolishing

Purification of metals

Processing technologies

Fused salt electrolysis process

Electron beam perforation

Applications

The electrometallurgy of aluminium

Aqueous solution processing
