

CALL FOR PAPERS

ICACST 2022
Jun 21-22, 2022
Vienna, Austria

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICACST 2022 : International Conference on Asynchronous Communication Systems and Technologies is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Asynchronous Communication Systems and Technologies. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Asynchronous communication

Physical layer

Data link layer and higher

Application layer

Information theory

Information source

Information measure

Information management

Electronically mediated
communication

Asynchronous message passing system
models

Process models

Time and the process channel model

Synchronous systems

Monitoring models

Processes and events

Local and global states

Process coordination

Time, time intervals and global
time

Cause-effect relationship,
concurrent events

Logical clocks

Message delivery to processes

Process algebra

Final remarks on process models
