

CALL FOR PAPERS

ICAICS 2022
Jun 21-22, 2022
Vienna, Austria

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAICS 2022 : International Conference on Artificial Intelligence in Communication Systems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Artificial Intelligence in Communication Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Artificial intelligence (AI) in communication
Communication and AI
AI for communications resource management
Managing future communications
AI and communications systems of the future
AI techniques and complex networks
AI methodologies in solving communication and network optimization problems
AI and social networks
AI and media technologies
AI applications, methodology, data and analysis for communication systems

Network design, maintenance, monitoring and control
Simulation using the network models
Network configuration and reconfiguration
Network management
Network fault diagnosis and testing
Current applications of AI in communication systems and networks
Concurrency and asynchrony
Decentralization and insufficiency
Inadequacy and continuity
Negotiability and evolution
