

CALL FOR PAPERS

ICCDE 2022
Jun 21-22, 2022
Vienna, Austria

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCDE 2022 : International Conference on Crystal Defects is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Crystal Defects. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Crystal defects	Impurities, weight and atomic composition
Crystallographic defect	Interstitial solid solutions
Thermomechanical processing	Composition / concentration
Point defects	Composition conversions
Line defects	Space and time scales
Planar defects	Finite size effects
Bulk defects	Diffuse scattering
Volume defects	Classification of disorder in crystals
Two-dimensional defects	Substitutional disorder
Mathematical classification methods	Dynamic displacive disorder
Computer simulation methods	Simple diffuse scattering calculations
Vacancies	Experimental techniques
Interstitials	Electron microscopy
