

CALL FOR PAPERS

ICCEMPC 2022
Jun 21-22, 2022
Vienna, Austria

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCEMPC 2022 : International Conference on Corrosion Engineering: Measurements, Prevention and Control is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Corrosion Engineering: Measurements, Prevention and Control. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Corrosion engineering	Corrosion economics
Corrosion engineering and applications	Corrosion failures
Advances in corrosion engineering	Corrosion measurements
Catastrophic corrosion damage	Galvanic corrosion
Electrochemical reactions of corrosion	Pitting and crevice corrosion
Electrochemical kinetics of corrosion	Stress corrosion cracking
Corrosion and environment	Atmospheric corrosion
High-temperature corrosion	High-temperature corrosion
Modeling, life prediction and computer applications	Corrosion of structural concrete
Corrosion maintenance	Organic coatings
Materials selection for corrosion prevention	Corrosion inhibitors
Chemical compositions of engineering alloys	Cathodic protection
