

CALL FOR PAPERS

ICCEST 2022
Jun 21-22, 2022
Vienna, Austria

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCEST 2022 : International Conference on Corrosion Engineering, Science and Technology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Corrosion Engineering, Science and Technology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

| | |
|---|----------------------------------|
| Corrosion engineering | Corrosion economics |
| Corrosion engineering and applications | Corrosion failures |
| Advances in corrosion engineering | Corrosion measurements |
| Catastrophic corrosion damage | Galvanic corrosion |
| Electrochemical reactions of corrosion | Pitting and crevice corrosion |
| Electrochemical kinetics of corrosion | Stress corrosion cracking |
| Corrosion and environment | Atmospheric corrosion |
| High-temperature corrosion | High-temperature corrosion |
| Modeling, life prediction and computer applications | Corrosion of structural concrete |
| Corrosion maintenance | Organic coatings |
| Materials selection for corrosion prevention | Corrosion inhibitors |
| Chemical compositions of engineering alloys | Cathodic protection |
