

CALL FOR PAPERS

ICCPII 2022
Jun 21-22, 2022
Vienna, Austria

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCPII 2022 : International Conference on Chemical Process Intensification and Integration is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Chemical Process Intensification and Integration. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Process intensification	Compact and micro-heat exchangers
Advanced process intensification	Reactors
Process intensification in chemical engineering	Intensification of separation processes
Process intensification for scalable chemical production	Intensified mixing
Environmental goals and sustainable processing	Application areas of process intensification
Reaction engineering applications	Petrochemicals and fine chemicals
Heat exchange in reaction engineering	Offshore processing
Process intensification technologies for green chemistry	Miscellaneous process industries
Process intensification in the chemical industry	The built environment, electronics and the home
The mechanisms involved in process intensification	Specifying, manufacturing and operating PI plant
