

# CALL FOR PAPERS

**ICCPMS 2022**  
**Jun 21-22, 2022**  
**Vienna, Austria**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCPMS 2022 : International Conference on Computational Phylogenetics and Molecular Systematics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Computational Phylogenetics and Molecular Systematics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Computational phylogenetics  
Phylogenetic trees and networks  
Morphological and molecular  
analysis  
Distance-matrix methods  
Maximum parsimony  
Maximum likelihood  
Bayesian inference  
Model selection

Homoplasy  
Horizontal gene transfer  
Hybrids, speciation, introgressions  
and incomplete lineage sorting  
Taxon sampling  
Phylogenetic signal  
Continuous characters  
Missing data
