CALL FOR PAPERS

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICDRITM 2022 : International Conference on Differentiation Rules and Integration Techniques in Mathematics is
the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Differentiation Rules and Integration Techniques in Mathematics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Differentiation rules
Common derivatives and integrals
Standard integration techniques
Elementary rules of differentiation
Differentiation is linear
The product rule
The chain rule
The inverse function rule
Power laws, polynomials, quotients and reciprocals
The polynomial or elementary power rule

The reciprocal rule
The quotient rule
Generalized power rule
Derivatives of exponential and logarithmic functions
Logarithmic derivatives
Derivatives of trigonometric functions
Derivatives of hyperbolic functions
Derivatives of special functions
Derivatives of integrals
