

CALL FOR PAPERS

ICEACS 2022
Jun 21-22, 2022
Vienna, Austria

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEACS 2022 : International Conference on Engineering Applications of Control Sensors is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Engineering Applications of Control Sensors. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- Control sensors
- Process control sensors
- Sensors for automation applications
- Control sensors and engineering applications
- Recent developments in sensors
- The role of sensor in control systems
- Control sensors and advanced applications
- Sensor technology in applications of control engineering
- Control engineering and sensor technology
- Accelerometers, inclinometers and gyroscopes
- Mechanical sensors
- Optical sensors
- Optical fiber sensors
- Photonic sensors
- Biological, chemical sensors, immunosensors and biomems
- Temperature sensors
- Pressure sensors
- Acoustic sensors
- Electromagnetic sensors
- Gas sensors
- Humidity sensors
- Infrared sensors, devices and thermography
- Radiation sensors
- Robot sensors
- Multi sensor fusion technology
- Smart and intelligent sensors
