

# CALL FOR PAPERS

**ICEEET 2022**  
**Jun 21-22, 2022**  
**Vienna, Austria**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEEET 2022 : International Conference on Ecomechatronics and Energy Efficiency Technologies is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Ecomechatronics and Energy Efficiency Technologies. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

|                                    |   |
|------------------------------------|---|
| Ecomechatronics                    | Active vibration damping                    |
| Energy efficient electrical motors | Rapid control prototyping                   |
| Variable frequency drives          | Machine control                             |
| Variable hydraulic pumps           | Energy consumption minimization             |
| Energy storage technologies        | Energy management of energy storage systems |
| Design methods and tools           | Model-based control                         |
| Energetic simulations              | Self-learning control                       |
| Energy demand optimization         | Optimal machine control                     |
| Vibro-acoustic analysis            |   |
