

CALL FOR PAPERS

ICESCEE 2022
Jun 21-22, 2022
Vienna, Austria

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICESCEE 2022 : International Conference on Energy Storage, Conversion and Electrical Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Energy Storage, Conversion and Electrical Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Adv. anode and cathode mat. for LIB	Metal-air batteries
Advanced characterization techniques	Nanoparticles and core-shell structures
All solid state batteries	New generation batteries
Batteries for grid energy storage	Novel processing in cell and stack materials
Capacitive energy storage systems	Porous and nanoscaffold hybrid materials
Ceramic and metallic interconnects	Safety and interfaces
Computational modeling of processes in SSHS	Sealing materials
Electrolytes; oxygen ion, proton and mixed conductors	Storage tanks
Fuel cell catalysts and catalyst support	Synthesis of novel materials
Hybrid capacitors	Thin films
Metal hydride batteries
