

CALL FOR PAPERS

ICFES 2022
Jun 21-22, 2022
Vienna, Austria

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICFES 2022 : International Conference on Financial Engineering and Software is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Financial Engineering and Software. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Software engineering for financial services
Programming in financial applications
Software technologies and financial industry
Business context and organisational structures
Financial software systems and financial market
Building flexible architectures for applications
Advanced C++ programming
Advanced system design
Advanced web technologies
Agile cloud automation

Internet and cloud computing
Principles of banking
Software measurements and quality assurance
