

# CALL FOR PAPERS

**ICMEDSDR 2022**  
**Jun 21-22, 2022**  
**Vienna, Austria**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMEDSDR 2022 : International Conference on Materials Enabled Designs and Subassembly Design Requirements is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Materials Enabled Designs and Subassembly Design Requirements. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Materials enabled designs  
Product design requirements  
Subassembly design requirements  
Product element design requirements  
Materials selection process  
Materials information resources  
Manufacturing process considerations  
Component fabrication processes

Degradation and reliability of materials  
Testing protocols  
Testing problems  
Product planning  
Control documents  
Materials engineering considerations for system-level design  
Detail design and testing
