

CALL FOR PAPERS

ICMSC 2022
Jun 21-22, 2022
Vienna, Austria

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMSC 2022 : International Conference on Macromolecular and Supramolecular Chemistry is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Macromolecular and Supramolecular Chemistry. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Analytical and environmental chemistry
Organic materials and supramolecular chemistry
Ternary and multinary compounds
Biochemistry and technology
Biobased chemicals
Synthesis and application of curved organic molecules and materials
Inorganic chemistry
Designing new heterogeneous catalysis
Macromolecular chemistry
Nanoparticle synthesis and assembly
Organic and medicinal chemistry
Photovoltaic energy conversion
Physical and theoretical chemistry

Synthesis in organic chemistry
Chemical sciences and technologies
The economy and impact on chemicals in the region
Global feedstocks and energy outlook
Flow chemistry
Industrial green chemistry
State of the global chemical industry
Solid oxide electrolysis
Single molecule microscopy and spectroscopy
Carbon dioxide utilization
Nanoparticles with morphological and functional anisotropy
Ethylene and propylene developments
coal to chemicals updates
Renewable chemicals from waste
