

CALL FOR PAPERS

ICRASMFP 2022
Jun 21-22, 2022
Vienna, Austria

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICRASMFP 2022 : International Conference on Recent Advances in Sheet Metal Forming Processes is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Recent Advances in Sheet Metal Forming Processes. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Methods for the optimization,
robust design and control of sheet
metal forming processes
Through process modeling from sheet
production to crash simulation
Advanced damage modeling for sheet
and tool material
Prediction of residual stresses and
springback
Novel methods for characterization
of sheet metal forming properties
and parameter identification
Models for new sheet materials

Models for flexible and sheet-bulk
forming processes
Constitutive modeling of sheet
metal, especially multi-scale
analysis
Models for warm forming of sheet
metal
Friction models, especially for new
tribological conditions such as dry
forming or forming with structured
tool surfaces
New element formulations and
solution techniques
