

CALL FOR PAPERS

ICSEBM 2022
Jun 21-22, 2022
Vienna, Austria

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSEBM 2022 : International Conference on Subsurface Exploration and Boring Methods is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Subsurface Exploration and Boring Methods. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- Subsurface exploration
- Subsurface investigations
- Geophysical tests
- Formation of soils and landforms
- Field reconnaissance
- Sampling techniques and tools
- Boring methods
- Sampling methods
- The standard penetration test (SPT)
- The cone penetration test (CPT)
- Log of boring information (boring logs)
- Groundwater measurements
- Ground conductivity

- Electrical resistivity traversing
- Gravity methods
- Geotechnical site characterization
- Geotechnical and geophysical site characterization
- Modern methods for subsurface site characterization
- Investigation design
- Soil strength
- Groundwater monitoring
- Data presentation
- Field and laboratory testing
- Sub-level structure feasibility
- Seismic hazard evaluation
- Laboratory investigation methods
