

# CALL FOR PAPERS

**ICSEGM 2022**  
**Jun 21-22, 2022**  
**Vienna, Austria**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSEGM 2022 : International Conference on Subsurface Exploration and Groundwater Measurements is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Subsurface Exploration and Groundwater Measurements. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Subsurface exploration  
Subsurface investigations  
Geophysical tests  
Formation of soils and landforms  
Field reconnaissance  
Sampling techniques and tools  
Boring methods  
Sampling methods  
The standard penetration test (SPT)  
The cone penetration test (CPT)  
Log of boring information (boring logs)  
Groundwater measurements  
Ground conductivity

Electrical resistivity traversing  
Gravity methods  
Geotechnical site characterization  
Geotechnical and geophysical site characterization  
Modern methods for subsurface site characterization  
Investigation design  
Soil strength  
Groundwater monitoring  
Data presentation  
Field and laboratory testing  
Sub-level structure feasibility  
Seismic hazard evaluation  
Laboratory investigation methods
