

# CALL FOR PAPERS

**ICSPMIP 2022**  
**Jun 21-22, 2022**  
**Vienna, Austria**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSPMIP 2022 : International Conference on Satellite Photogrammetry and Multi-Image Processing is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Satellite Photogrammetry and Multi-Image Processing. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Satellite photogrammetry	Applications
Photogrammetric methods	Computational models
Digital photogrammetry	High-speed photography and remote sensing
Digital photogrammetry devices	Photogrammetry and laserscanning
Digital photogrammetric systems	Data acquisition
Earth/planetary observations	Maps
Space based imaging and ranging sensors	Photogrammetric procedures and instruments
Satellite-based analysis	Properties of aerial photography
Analytical space resection and space intersection	Coordinate systems
Multi-image processing	Photo-coordinate system
Mathematical models for image-triangulation	Object space coordinate systems
Imagery analysis and integration	Measuring systems
