

CALL FOR PAPERS

ICTEYMSP 2022
Jun 21-22, 2022
Vienna, Austria

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICTEYMSP 2022 : International Conference on Textile Engineering, Yarn Manufacture, Structure and Properties is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Textile Engineering, Yarn Manufacture, Structure and Properties. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Textile engineering	Basic computer technologies
Principles of textile engineering	Technical drawing
Textile fibers	Clothing machinery
Classification of textile fibers	Textile chemistry
Fiber forming polymers	Machine design process
Methods of investigating fibre structure	Transmission technology
Yarn manufacture	Quality management
Yarn structure and properties	Factory planning
Principles of opening, cleaning and blending of fibrous materials	Machine dynamics
Fabric manufacture, structure and properties	Textile physics
Textile testing	Clothing, weaving and knitting
Physical testing of textiles	Quality control in textiles
Chemical processing	Fabric design
