

CALL FOR PAPERS

ICMASMT 2022
Jul 19-20, 2022
Helsinki, Finland

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMASMT 2022 : International Conference on Morphological Analysis for Statistical Machine Translation is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Morphological Analysis for Statistical Machine Translation. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Morphological analysis
Morphological analysis techniques
Morphological modelling and description
Morphological analysis and vocabulary
Morphological analysis and phonological analysis
Morphological analysis in sentence reading
Morphological analysis of disrupted morphemes
Theoretical approaches to morphological analysis
Morphological analysis and synthesis

Aspects of morphological structures in linguistic analysis
Issues concerning the morphological structure of languages
Vocabulary development
Morphological analysis for statistical machine translation
Two-level model for morphological analysis
Rules of pronunciation
Morphophonemics
Acquisition of linguistic rules
Automated learning of morphological rules
