

# CALL FOR PAPERS

**ICBTM 2022**  
**Jul 26-27, 2022**  
**London, United Kingdom**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICBTM 2022 : International Conference on Biosensor Technologies and Microelectronics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Biosensor Technologies and Microelectronics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Biosensor technologies  
Biosensors and bioelectronics  
Biosensing technology  
Biophotonics  
Security and sensing  
Photonic sensor technologies  
Nano-bio-optics  
BioMEMS/NEMS  
Advancement in nanotechnology

Bioinstrumentation  
Environmental biosensors  
Biosensors for imaging  
DNA chips and nucleic acid sensors  
Sensor networks and data  
communications  
Nanobiosensors  
Nanobioelectronics  
Biosensing technology  
Application of biosensors in drug  
delivery and clinical chemistry
