

CALL FOR PAPERS

ICECE 2022
Jul 19-20, 2022
Toronto, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICECE 2022 : International Conference on Electroanalytical Chemistry and Electrochemistry is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Electroanalytical Chemistry and Electrochemistry. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- | | |
|---|---|
| Electroanalytical chemistry | Cell EMF dependency on changes in concentration |
| Electroanalytical methods and methodologies | Balancing redox reactions |
| Electroanalytical sensing systems | Quantitative electrolysis and faraday's laws |
| Electroanalytical measurements | Electrochemical sensing |
| Potentiometric measurements | New potential electrode materials |
| Voltammetric measurements | Electrolysis of molten sodium chloride |
| Electrochemical sensors for clinical analysis | New strategies for electrochemical |
| Electrochemical cells and reactions | Sensors and biosensors |
| Electrochemical potentials | Electrochemical cells |
| Junction potentials | Standard electrode potential |
| Oxidation and reduction | Spontaneity of redox reaction |
