

CALL FOR PAPERS

ICWSE 2022
Jul 29-30, 2022
Zurich, Switzerland

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICWSE 2022 : International Conference on Weapon Systems Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Weapon Systems Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Weapon systems
Weapon systems technology
Weapon and sensor systems
Autonomous weapon systems
Weapon systems, optics and sensors
Combat systems design
Communications equipment
Electronic warfare systems
Mortar systems
Ammunitions
Optronics
Rocket systems

Sensors
Sonars
Warship prime contracting
Navy missiles, torpedoes, and
weapon systems
Weapon systems, optics, sensors,
camouflage
Small arms weapon systems
performance - combat experience
and trends
Progress in ballistic performance
of small arms ammunition
New calibres and their
standardization for small arms
Future electronic equipment of
small arms
Optoelectronics technology and
devices
Sensors integration into the
systems
Adaptive and optical camouflage
