

CALL FOR PAPERS

ICOCAS 2022
Aug 23-24, 2022
Budapest, Hungary

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICOCAS 2022 : International Conference on Optimal Control Applications and Systems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Optimal Control Applications and Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Optimal control	Parametric optimization
Optimal control applications and systems	Semidefinite programming
Optimization theory, methods and algorithms	Applications of optimization in engineering
Optimal control and optimization techniques	Aerospace control applications
Intelligent optimization	Robotics and path planning
Closed-loop stability	Robotics and robots
Model predictive control	Circuits and systems
Linear-quadratic-gaussian control	Computational intelligence
Process control	Computer based control systems
Global optimization	Control systems
Combinatorial optimization	Industrial electronics
