

CALL FOR PAPERS

ICEACACP 2022
Aug 19-20, 2022
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEACACP 2022 : International Conference on Environmental Analytical Chemistry and Analytical Chemistry of Pollutants is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Environmental Analytical Chemistry and Analytical Chemistry of Pollutants. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Environmental analytical chemistry
Green analytical chemistry
Fundamentals, methods, and instrumentation aspects of environmental analytical chemistry
Speciation
Mass spectrometry
Separations
Spectroscopy
X-ray techniques
Trace metal analysis
Isotopic ratio determination
Environmental chemistry
Quality assurance in environmental analysis
Environmental sampling

Preconcentration of environmental samples
Environmental control standards
Determination of inorganic gaseous pollutants in air
Determination of organic gaseous pollutants in air
Physical and chemical characterization of particulate airborne matter
Determination of inorganic pollutants in waters
Determination of organic pollutants in water
Determination of soil pollutants
Speciation in environmental analysis
Chemometrics in environmental analysis
Environmental measurement and monitoring
Environmental risk assessment of air, water and soil
