

CALL FOR PAPERS

ICFCS 2022
Aug 19-20, 2022
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICFCS 2022 : International Conference on Fuels and Combustion Science is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Fuels and Combustion Science. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Combustion science	Heterogeneous combustion
Gas-phase reaction kinetics	Instrumentation and control
Detonations, explosions, and supersonic combustion	New combustion processes and devices
Laminar and turbulent flames	Numerical simulation
Spray, droplet, and supercritical combustion	Flame and fire research
Solid fuel combustion	Flame radiation
Stationary combustion systems and control of greenhouse gas emissions	Chemical fuels and propellants
Internal combustion engines	Reacting flows
Gas turbine and rocket engine combustion	Thermochemistry
Combustion and pollution	Material synthesis
Engine design	Aircraft gas turbines
Gas turbine combustion	Chemical rockets
