

# CALL FOR PAPERS

**ICGCA 2022**  
**Aug 19-20, 2022**  
**London, United Kingdom**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGCA 2022 : International Conference on Green Composites and Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Green Composites and Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Green composites  
Green composite materials  
Sustainable green composites  
Wood based composites  
Bamboo based composites  
Other plant fiber composites  
Bioresins and biopolymers derived from natural resources  
Fiber treatment and resin modification for biocomposites  
Cellulose and nanocellulose composites  
Green composite fabrication, characterization, evaluation, and application  
Life cycle assessment  
Natural fiber sources  
Alternative fiber sources

Natural polymer sources  
Green fiber thermoplastic composites  
Re-use, recycling and degradation of composites  
Reprocessing of composites  
Recent developments in green composites based on plant fibers  
Green composites from natural resources  
Green composite material evaluation and processing  
High performance green composites  
Green composites for engineering applications  
Hybrid green composites  
Tensile and compression properties of green composites  
Mechanical and dynamic mechanical analysis of green composites  
Commercial and experimental green composites
