

CALL FOR PAPERS

ICNSA 2022
Aug 19-20, 2022
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICNSA 2022 : International Conference on Nonlinear Sciences and Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Nonlinear Sciences and Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Mathematical modelling of nonlinear phenomena
Theories and general methods in nonlinear science
Chaos and bifurcation
Fractals and solitons
Nonlinear control

Nonlinear dynamical systems and complexity
Computational methods and numerical simulations in nonlinear science
Dynamics and numerical methods for nonlinear differential equations
Theoretical and computational nonlinear fluid dynamics
