

# CALL FOR PAPERS

**ICCSCM 2022**  
**Aug 16-17, 2022**  
**Tokyo, Japan**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCSCM 2022 : International Conference on Chemical Synthesis of Ceramic Materials is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Chemical Synthesis of Ceramic Materials. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Ceramic chemistry	Surface and colloid chemistry in ceramics processing
Chemistry of ceramic materials	Clay analysis
Chemical preparation of ceramic materials	Crystal structures in ceramics
Chemical synthesis of ceramic materials	Silicate ceramics
Ceramics and thermodynamics	Carbon
Thermal analysis of ceramic raw materials	Imperfections in ceramics
Clay and non-clay ceramic	Plastic deformation in ceramics
Physical properties of fired ceramics and ceramic glazes	Ceramics for energy conversion and storage
Structure and chemical properties of ceramics	Ceramics for environmental and energy applications
Applications and processing of ceramic	Ceramics for medicine, biotechnology and biomimetics
Application of ceramic chemistry	Ceramic and glass materials
