

# CALL FOR PAPERS

**ICMISO 2022**  
**Aug 16-17, 2022**  
**Tokyo, Japan**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMISO 2022 : International Conference on Marine Informatics and Satellite Oceanography is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Marine Informatics and Satellite Oceanography. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Marine informatics  
Marine geoinformatics  
Coastal marine informatics  
Marine image analysis and management  
Marine geographical information science  
Seabed characterization, dynamics and modelling  
Data visualization  
Exploration geodynamics and interactive inversion

Satellite oceanography and marine informatics  
Indicators and informatics for marine ecosystems  
Indicators of sustainable ecosystems  
Marine integrated ecosystem assessments  
Distribution and recovery of data streams from various sources  
Analysis of large amounts of data from various data sources  
Digital platforms for information and service interaction
