

CALL FOR PAPERS

ICFPMM 2022
Aug 16-17, 2022
Istanbul, Turkey

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICFPMM 2022 : International Conference on Food Processing, Manufacturing and Management is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Food Processing, Manufacturing and Management. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Food processing technology
History of food processing and food processing technology
Benefits and drawbacks of food processing technology
Performance parameters for food processing
De-agglomerating batter mixes in food processing
Trends in modern food processing
Important issues: health, hygiene, efficiency, minimization of waste, labour
Articles, columns and products covering innovation in all types of processing machinery and technologies
Current market trends: Palm, lauric oils and co-products
Rural vegetable oil production

Large-scale production: Storage, processing and oil refining
Cholesterol, saturated and unsaturated fatty acids
Energy management and by product valorization
Downstream processing and value added products
Economic analysis and profitability
Food engineering model: past, present and future
Food safety: prevention and control
Food and public health
The chemistry of food ingredients
Food industry: edible oils and others
