

CALL FOR PAPERS

ICCWTS 2022
Aug 23-24, 2022
Kuala Lumpur, Malaysia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCWTS 2022 : International Conference on Controls for Wind Turbine Systems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Controls for Wind Turbine Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Wind power grid connection issues under high penetration
Power electronics control of wind turbine induction and permanent magnet generators
Power electronics converter topologies and controls for wind turbine systems
FACTS applications for wind power
Modeling and simulation of wind power converters and wind power generators
Residential/Rural applications and other small wind turbine systems
Low wind-speed technologies

Wind forecasting for dispatching of distributed wind generation sources
Islanding and protection capabilities
Generator design for wind energy systems
Energy storage technologies for use with wind generating sources
Off shore wind power
PMUs / Wide Area Monitoring
Protection and Control for wind integration
