

CALL FOR PAPERS

ICHMSIM 2022
Aug 23-24, 2022
Kuala Lumpur, Malaysia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICHMSIM 2022 : International Conference on Human-Machine Systems and Interaction Models is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Human-Machine Systems and Interaction Models. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Human-machine systems	Genetic and evolutionary computation
Agents and agent-based systems	Heuristic algorithms
Artificial immune systems	Human-machine interfaces
Artificial life	Human-robot interaction
Biologically inspired systems	Unmanned systems
Bioinformatics/ collective robotics	Image processing
Computational intelligence	Pattern recognition
Cybernetics for informatics	Intelligent systems
Decentralized systems	Interactive and digital media
Distributed systems	Interactive design
Embedded intelligence	Intelligent internet systems
Evolutionary robotics	Kansei (sense/emotion) engineering
Fuzzy systems and their applications	Knowledge discovery and data mining
