

CALL FOR PAPERS

ICMAS 2022
Aug 23-24, 2022
Kuala Lumpur, Malaysia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMAS 2022 : International Conference on Mobile Application Security is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Mobile Application Security. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- app and app store security and privacy;
- benchmarking and evaluation of mobile security solutions;
- bots on mobile devices;
- cloud security and privacy, as related to mobile devices;
- mobile device forensics;
- security and privacy in mobile device operating systems and middleware;
- mobile malware collection, statistics, and analysis;
- mobile services and social networking security;

- reverse engineering and automated analysis of mobile malware;
- security for smart payment applications, including near-field communication;
- standardization efforts related to developing and vetting mobile apps;
- testbeds and case studies for mobile platforms;
- traffic monitoring and detection algorithms for mobile platforms;
- virtualization solutions for mobile security; and
- Web browser security on mobile devices
