

CALL FOR PAPERS

ICOCE 2022
Aug 23-24, 2022
Kuala Lumpur, Malaysia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICOCE 2022 : International Conference on Offshore Construction Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Offshore Construction Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Offshore construction
Offshore development
Offshore construction design and management
Types of offshore structures
Steel template structures
Concrete gravity platforms
Compliant structures
Floating structures
Subsea system
Offshore construction materials and corrosion
Design of offshore steel structures

Structural design of offshore units
Dynamic and fatigue analysis
Marine structures and contracts
Interaction of design and construction
Environmental aspects of marine and offshore construction
Highway, rail, barge, and air traffic
Protection of existing structures
Materials and fabrication for marine structures
Steel structures for the marine environment
Marine and offshore construction equipment
