

CALL FOR PAPERS

ICPECB 2022
Aug 23-24, 2022
Kuala Lumpur, Malaysia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICPECB 2022 : International Conference on Protein Engineering and Chemical Biology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Protein Engineering and Chemical Biology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Protein engineering
Enzymology and enzyme engineering
Protein design and computational applications
Rational design
Multiple sequence alignment
Coevolutionary analysis
Structural prediction
Directed evolution
Examples of engineered proteins

Screening and selection techniques
Protein engineering methods and applications
Food and detergent industry applications
Environmental applications
Medical applications
Applications for biopolymer production
Nanobiotechnology applications
Applications with redox proteins and enzymes
Applications with various industrially important enzymes
