

CALL FOR PAPERS

ICUDT 2022
Aug 09-10, 2022
Lagos, Nigeria

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICUDT 2022 : International Conference on Ultrasonics and Doppler Techniques is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Ultrasonics and Doppler Techniques. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Ultrasound engineering, imaging and clinical applications
Ultrasonic measurement of material properties
Physics and computer simulations
Transducer technologies
Ultrasound tomography and reconstruction
Tissue characterization
Elastography

Motion and deformation imaging
Ultrasound hardware development and evaluation
Ultrasonic imaging, photoacoustic imaging and Doppler techniques, including transducer and array technology
Signal processing and pattern recognition
Ultrasound-guided intervention and robotic ultrasound imaging
Ultrasonic and photoacoustic characteristics of tissue and their dependence on physical and biological variables
