

CALL FOR PAPERS

ICWHTDCMC 2022
Aug 09-10, 2022
Lagos, Nigeria

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICWHTDCMC 2022 : International Conference on Wearable Health Technology, Design Considerations and Major Challenges is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Wearable Health Technology, Design Considerations and Major Challenges. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Healthcare wearables
Healthcare wearable technologies
Wearable health technology
Smart wearable healthcare devices
Wearable technology and preventative healthcare
Wearable health technology in medical arenas
Medical technology
Design considerations and major challenges
Sensor technology

User friendly design
Connectivity technology
Healthcare wearables in clinical trials
Wearable sensors for remote healthcare monitoring system
Branded hospital apps in patient engagement
Patient safety
Engineering applications
Future directions
Technological perspectives
