

CALL FOR PAPERS

ICBDSHI 2022
Aug 19-20, 2022
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICBDSHI 2022 : International Conference on Big Data, Smart Health and Informatics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Big Data, Smart Health and Informatics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Big data, smart health and health informatics

Big data analytics for clinical care

Medical data management and mining

Big data integration for healthcare

Text mining for healthcare notes and literature

Smart systems for electronic health records

Smart methodologies for healthcare

Smart diagnosis

Smart information retrieval for healthcare applications

Smart medical devices and sensors

Smart monitoring for healthcare

Intracommunity e-communities for patients and caregivers, such as social media, social networks and social groups

Smart e-conference and teleconference systems for doctors and patients

Smart medical devices and software

Visual analytics for healthcare

Privacy and security concerns in smart healthcare

Smart systems for telemedicine

Smart healthcare villages or smart healthcare cities

E-health/one health

RFID and body sensors

Wearable sensors

Intelligent sensors

Next-generation healthcare infrastructure

Cost-effective home health monitoring

Smart shirts

Embedded computing systems
