

CALL FOR PAPERS

ICCTATCS 2022
Aug 19-20, 2022
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCTATCS 2022 : International Conference on Coding Theory and Applications in Theoretical Computer Science is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Coding Theory and Applications in Theoretical Computer Science. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Coding theory
Coding theory and theoretical
computer science
Data compression, error-correction
and networking
Source coding
Channel coding
Linear codes
Linear block codes
Convolutional codes
Cryptographical coding

Line coding
Applications of coding theory
Group testing
Analog coding
Neural coding
Cyclic codes and goppa codes
Burst correcting codes
Coding theory and cryptology
